

Transfer / Collaboration Opportunity

Beer filtration

Research Center / Laboratory : **Agro Industry laboratory - GLUFREE Project**
 University College : **Haute Ecole Charlemagne**
 Field : **Agro Industry**

KEYWORDS

Gluten-free;
 Natural process;
 Beer;
 Brewery;

Description :

Specific process to produce a gluten-free beer based on well established know-how and an ecological process easy to implement.

The process is based on gluten precipitation during the brewing process.

Benefits / Advantages :

- Easy to implement on conventional production line
- Use of a natural product (cheap and easy to obtain)
- Compatible with the «BIO» label
- Assurance to obtain a beer with less than 20 ppm gluten
- Applicable to current beer recipes
